HYGIENE PROTOCOL

ON-LOCATION MAKEUP · PORTRAITS AND EVENTS

> Hygiene is a section of my quote, not an afterthought.

This document sets out how I work on site. Forward it to HR or to your health and safety officer — it covers everything they usually check.

RULES I WORK BY

01 Fresh disposable applicators and sponges for each person

02 Product scooped out with a spatula — never straight from the container onto a face

03 Pressed products and metal tools disinfected with 70% alcohol

04 Pencils sharpened before each new person

PRODUCTS

I work with professional-grade products. Each one is scooped out with a spatula and applied with a brush or a disposable applicator. No product touches a face directly.

WHAT I BRING

- A full case of high-end makeup
- Brushes, plus disposable supplies for each person
- A mirror and portable lighting
- Disinfectants

WHAT YOU PROVIDE

- A table and two chairs
- A power socket nearby
- About 4 sq m, by a window if possible
- A way to bring the case in

This protocol applies to all my on-location work — corporate portraits, events and productions. If you have a question about any point, get in touch.
